Personal Website

Education

Earl of March Secondary School

High School Diploma

Ottawa

Sep. 2018 - Jun. 2022

University of Ottawa

Honours Bachelor of Science in Computer Science (Co-op)

Ottawa

Sep. 2022 - Present

Technical Skills

Languages Java, Python, JavaScript, HTML/CSS, C/C++, R

FrameWorks React, Node.js, Express.js, Flask, JUnit, Firebase

Developer Tools Oracle APEX, Microsoft Fabric, PowerBi, Git, VS Code, Eclipse

Experience

Health Canada

Jr Developer

Ottawa

May 2024 - Aug. 2024

- Developed a CRM application using Oracle APEX, extracted data using JIRA API's with Python
- Migrated SAS code to R within Microsoft Fabric environment
- Collaborated with a team to deliver solutions, enhancing database management and data analysis capabilities.

Projects

Shortest Path Maze Solver

Python

Ottawa

Dec 2022 - Dec 2022

- Designed a shortest path maze solver using a depth-first search algorithm. A maze is inputted using an array of strings, the algorithm iteratively goes through this input and displays the shortest path using an array of strings with arrows indicating the path

MasterMind Game

Python

Ottawa

Nov 2022 - Nov 2022

- Created two different game modes that involve playing as the guesser or the code generator. As the guesser, a randomly generated 4-color sequence must be guess based off specific hints about the existence of each color in the sequence and correct positioning using a list implementation. If the user chooses to be the code generator, the computer will use the Donald Knuth algorithm to find the color sequence in a amount of guesses

Parking Lot Simulator

Java

Ottawa

Feb 2023 - Mar. 2023

- Optimizing parking space given arrival rate of cars using triangular distribution probability. A Singly Linked List Queue implementation was used for Incoming/Outgoing cars. Cars could only be parked in appropriate locations and saved in a 2-D array. Optimization was achieved by running various simulations until it reached a desirable minimal average queue length at the end of each simulation

Landing Page Template

HTML/CSS/JS/React/NodeJS

Ottawa

Nov 2023 - Dec 2023

- A template for an event planner website that I am currently working on. Allows for user authentication and backend is built using NodeJS connected to a MySQL database managed through phpmyadmin. Frontend is designed to have a modern and clean look using React.

FlappyBird

Java

Ottawa

Sep 2021 - Jan 2022

- Created a clone of the famous FlappyBird mobile game where the goal of the game is to get a bird through horizontally moving pipes by only jumping up. Built in java using the Swing GUI library for rendering animations and graphics. Can be played using keyboard and mouse listeners on desktop

Android Cycling App

Java/Firebase

Ottawa

October 2023 - Dec 2022

- Built with the using Android Studio this app lets cyclists register for cycling activities posted by cycling clubs. The app used Firebase to store data such as, users clubs and events.

Calendar

HTML/CSS/JS/React

Ottawa

Nov 2023 - Dec 2023

- Allows users to stay organized and plan out their days, weeks, or months with a simple to use add task feature all built using React-Big-Calendar and React-Date-Picker.
